S-Series

**Serious about
your coffee?**

Say it with Synesso.

PRO-LEVEL ENGINEERING, COMPACT FORM, REAL VALUE

The S-Series is a commercial quality, low-profile, volumetric unit designed for owners who need Synesso's famous build quality, premium components, and long-life reliability in a compact, value-minded package.

The minimal footprint design, essential extraction features and staff-ready intuitive interface make it a high-impact unit no matter how or where owners choose to use it.

Ambidextrous,
cool-touch
steam wands
& actuators

Stock black/white
powder-coated
panels and handles
can be customized

KEY BENEFITS

- Connect with your customers over a low-profile design that can be sunk further into bar tops.
- Prepare premium-quality espresso without a premium price via independent brew-boilers and other high-end internal components found in our leading products.
- Easily extract delicious espresso with volumetric recipes and one-tap controls that make use fast and fun.

PERFECT FOR

- Small to medium specialty coffee shops with traditional menus
- Multi-concept retailers (i.e. bakeries, restaurants, hotels, etc.)
- Roasters expanding into brick-and-mortar coffee retail

WARRANTY-BACKED QUALITY

- Lifetime on group-head components
- Extended parts warranty

Auto back-flush
arcade buttons

Hand-held controller
